

Water Warden™ Safety Pool nets Frequently Asked Questions

Why buy a safety net rather than a pool fence?

Both safety fences and safety nets protect your children and pets from pool access. However, the net system is great for homeowners with little deck space. Unlike safety fences, the net is installed flush with the pool deck, and takes up no visual space from around your pool area. Also, a safety net fits tightly above the water and even a baby cannot crawl under it. The safety net's 3.5" squares are too small for a child's body or head to fit through, but are too large to allow a child or pet to run or play on the net.

How convenient is it to use the pool if I have a pool net?

Most Water Warden™ Safety Pool nets can be removed and replaced in under 10 minutes. Pools with complicated rock elevations or waterfall details may require a few extra minutes for the removal and replacement of the safety net. The lightweight, water resistant reel included with each net helps to roll up the net and keep it contained when pool is being used. Always replace the Water Warden™ Safety Pool net completely when pool is no longer in use. Net must be removed entirely before using pool.

How will a Water Warden™ Safety Pool net look on my pool?

The Water Warden™ Safety Pool net is designed to blend in with your pool. It is attractive and unobtrusive, and does not inhibit pool or yard views. Your pristine waters or lighting system will not be affected by the use of a Water Warden™ Safety Pool net.

How strong are pool safety nets?

The Water Warden™ Safety Pool net is extremely strong. It is made of 100% Polyethylene net, with the maximum available UV resistance for long life in all climates. While designed to protect children and pets, the Water Warden™ Safety Pool net will safely support up to 485 lbs. Additionally, the Water Warden™ Safety Pool net is shipped with a triple binding around the edges, to increase its strength. The stainless steel attachment hooks will not rust or weaken.

Will holes have to be drilled in my deck?

The popular in-ground anchors require the drilling of ¾" holes in your deck.

How long will a safety net last?

When used properly, your Water Warden™ Safety Pool net will serve you well for many years. Water Warden™'s 100% Polyethylene netting is not affected by pool chemicals or chlorine. All Water Warden™ Pool Safety Products are routinely treated with the maximum available UV inhibitors to prevent sun damage. The stainless steel clips will not corrode or rust. And the included storage reel is water resistant. To add to your peace of mind, every Water Warden™ product comes with a 5 year manufacturer's limited warranty.
